The LiveSafer - Modular Public Access First Aid System (Epinephrine, Naloxone, Bleed)

AED Cabinets are already present in many facilities and currently we are seeing significant activity with adding EpiPens, Narcan and Stop The Bleed Kits to hallways in facilities such as schools. This is great, but it starts to present a storage problem. No one really wants to have 5 or 7 cabinets and cases on the wall - it's a lot of metal, it isn't cheap and there comes a point where we have to put this stuff back into a "first aid kit" of sorts.

The LiveSafer system is based on the idea that there is a simultaneous need for both General First Aid and very specific supplies for the life threatening emergencies: Sudden Cardiac Arrest, Anaphylaxis, Opioid Overdose, Choking, Severe Bleeding and Asthma Attacks. We kept trying to think of a turn-key cabinet to meet this need, but the fact is, medication and devices can only be purchased or budgeted for when the facility management sees the need. We can't force them to prepare for ALL of these emergencies at once, just because we have a cabinet that holds everything. That is why this system is modular. This version includes red LiveSafer cases for Epinephrine, Naloxone, and Severe Bleeding Control.

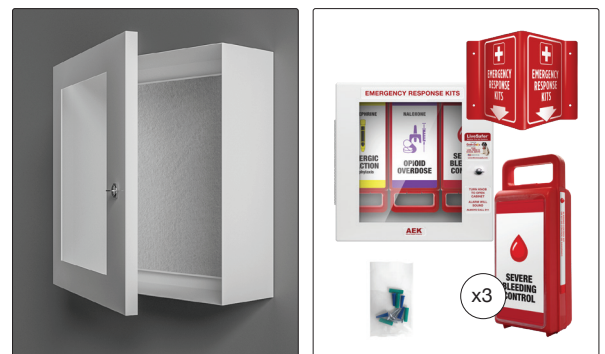

**No Medication Included - We Sell Empty Cases/Cabinets and You Obtain Your Own Medication*

**Let us know which labels you need when ordering.*

PRODUCT FEATURES:

- Store each life saving device or medication separately with its own laminated instruction sheet
- If you do not need all the inner cases yet you can consider making one case a general first aid supply kit with bandaids, neosporin, gauze -- this is often lacking in public spaces!
- The system utilizes our industry-leading Velcro loop back panel and Velcro-brand fasteners to ensure the cabinet works great and looks great regardless of configuration
- A critical part of our strategy is keeping supplies/devices for each incident type separate - because they are not generally needed simultaneously
- This cabinet concept empowers you to "grab and go" to the point of need - no carrying handfuls of stuff or making multiple trips for something forgotten
- Cabinet includes mounting hardware, thumb turn knob, instruction sheets.

Width: 17 in

Length: 17 in

Depth: 4 in

Weight: 20 lbs

Capacity: Up to 3 Inner Red Cases

Material: Metal

Color: White

Includes: Thumb Turn Knob, Mounting Hardware, Velcro®, 3D Wall Sign, and 3 Red Cases (empty) labeled for Epinephrine, Naloxone, and Severe Bleeding. Other labels can be installed upon request.
