

# EN10011

## Choking / Food Allergy Emergency Cabinet with Signage (Empty)

This cabinet is very specifically designed for school cafeterias and restaurants so staff can be prepared for the most likely incidents that happen while eating. As part of the LiveSafer™ Modular First Aid System, it is dedicated particularly for Choking Emergencies to store the LifeVac Rescue Device, and for Allergic Reactions (Anaphylaxis) to store Epinephrine. Top Label indicates Choking First Aid Kit, while bottom label indicates Allergy Emergency Kit. Includes yellow and black zipper case with Choking label and Inner Red Case with Allergic Reaction label. Sold Empty.

With its slim design (only 4 inches deep) it won't obstruct pathways. Supplies are kept conspicuous with a clear window display and easily accessible. Plus, when your LifeVac is used in an emergency, you can get a free LifeVac replacement, and easily swap it in and out of this cabinet.

*\*No Medication or LifeVac included.*
